🔗 Portfolio

Professional Profile

Data Scientist and LLM Engineer specialized in advanced analytics, machine learning, and generative AI systems. Designed and deployed multiple predictive models and recommendation systems that currently optimize user experience across various industries.

Work Experience

Data Science and Analytics Intern – MetLife (August 2024 – Present)

- Analyzed sales data and machine learning model outputs using Python, SQL, and BigQuery to identify top-performing agents and optimize commercial strategies.
- Segmented customers with clustering models and delivered segment-specific product recommendations, increasing regional sales by 12.5% .
- Developed a reliable LLM using the OpenAI API to extract and classify data from benefits and insurance policies, allowing employees to query the model directly without HR intervention.
- Developed a reinforcement learning model with neural networks in PyTorch for optimal real-time lead assignment, improving both sales conversion rate and operational efficiency.

Creator – Viaura (February 2025 – Present)

- Engineered a multi-agent LLM architecture (AutoGen + LangChain/LangGraph) that autonomously designs end-to-end travel itineraries.
- Performed customer behavioral analysis on search-and-booking data to surface intent patterns and fuel segment-based recommendation models.
- Designed conversational flows and adaptive preference filters that capture real-time user input and generate highly personalized suggestions.
- Implemented a vector database (FAISS/Chroma) for sub-100 ms retrieval of contextual embeddings powering retrieval-augmented generation.

Data Specialist – AppDirect (March 2023 – July 2023)

- Managed and optimized ETL pipelines for SaaS product analytics, ensuring data quality and reliability across multiple sources.
- Created and maintained dashboards in Power BI and Tableau to monitor key business and product metrics for cross-functional teams.
- Collaborated with engineering and product teams to implement data-driven solutions that supported strategic decision-making and business growth.

Education

- Bachelor's Degree in Data Science and AI – Universidad Católica Argentina (Mar 2023 – Aug 2026)
- AWS Generative AI Program - Amazon Web Services

Skills

- Programming languages: Python (Scikit-learn · Pandas · PyTorch · PySpark) · R · APIs · Git
- Databases: PostgreSQL · SQL Server
- Visualization: Power BI · Excel · Google Analytics
- Languages: English (Advanced – C1) · Spanish (Native)
